

**SYSTEM AND METHOD FOR POWER MANAGEMENT
IN A SERVER SYSTEM**

Abstract of the Disclosure

- 5 A cPCI server system includes a plurality of subsystems, each including an associated memory for storing power usage information. A power supply unit coupled to the plurality of subsystems provides power to the plurality of subsystems. A server management card is coupled to the plurality of subsystems. The server management card is configured to retrieve the power usage information from the memory of each
- 10 subsystem. The server management card is configured to calculate the total power usage of the plurality of subsystems based on the retrieved power usage information.
